

Burleigh-Morton COVID-19 Steering Committee

MEETING AGENDA

TEAMS MEETING

Monday, September 14, 2020

2:30 PM

I. Call to Order

Renae Moch called the meeting to order at 2:33 PM.

II. Subcommittee Reports / Goals for this Week

Healthcare Testing & Contact Tracing – Erin Ourada

Weekend testing requested by Governor's office was discussed with subcommittee members. The demand from the weekend testing site was not enough to justify the additional static testing sites since there are walk-in clinic facilities open over the weekends that could meet testing needs, so there is no intention to add a site staffed by local public health. Due to progress made in achieving their goals, this subcommittee will place weekly meetings on hold until further notice.

Educational Institutions & Activities – Anton Sattler

BPS unveiled dashboard this week. They plan to have elementary K-12 return to face-to-face learning on September 29th. Concerns remain regarding community spread outside of schools and campuses. Due to progress made in achieving their goals, this subcommittee will place weekly meetings on hold until further notice.

Underserved/Vulnerable Populations – Dr. John Hagan Renae Moch reported for Dr. Hagan. This group continues to make progress on the support services for the COVID-19 shelter.

Business Community – Brian Ritter

The Business Subcommittee provided input to Renae & Erin on dashboard data and clarified the definition of a close contact (contact within 6 ft and 15 minutes cumulatively in the course of 1 day). This subcommittee will implement an every-other-week meeting schedule following the schedule of the large group task force meetings. Will continue to share information regarding testing sites continue to provide information for businesses as resources.

Public Education – Kalen Ost

The website for the public education campaign has been launched and is available to the public: www.covidstopshere.com. A campaign is rolling out as of today for digital media/social media. Next steps will be to work on the Q&A section and what information it should contain.

III. Strategies / Next Steps

- Keep focusing efforts to lower our 14-day rolling average positivity rate.
- Many accomplishments have been identified so far and we should continue to work on moving forward with the projects that have been set in motion.
- Steering committee will continue to meet weekly.

IV. Other Items Brought Forward by Committee Members

None

Meeting adjourned at 3:30 PM

Respectfully submitted,
Renaë Moch
